Research Interests

Nested Named Entity Recognition, Relation Extraction, Biomedical NLP, Domain Adaptation for Information Retrieval

Publications

- Overview of BioASQ 2026: The Fourteenth BioASQ Challenge on Large-Scale Biomedical Semantic Indexing and Question Answering** Sept 2026
 Anastasios Nentidis, Georgios Katsimpras, Anastasia Krithara, Martin Krallinger, Miguel Rodríguez-Ortega, Eduard Rodríguez-López, Natalia Loukachevitch, **Igor Rozhkov**, Elena Tutubalina, Dimitris Dimitriadis, et al.
 (International Conference of the Cross-Language Evaluation Forum for European Languages (CLEF 2026))
- Learning Nested Named Entity Recognition from Flat Annotations** Mar 2026
Igor Rozhkov, Natalia V Loukachevitch
[10.18653/v1/2026.eacl-srw.50](https://doi.org/10.18653/v1/2026.eacl-srw.50) (Proceedings of the 19th Conference of the European Chapter of the Association for Computational Linguistics (Volume 4: Student Research Workshop))
- BioASQ at CLEF2026: The Fourteenth Edition of the Large-Scale Biomedical Semantic Indexing and Question Answering Challenge** Jan 2026
 Anastasios Nentidis, Georgios Katsimpras, Anastasia Krithara, Martin Krallinger, Miguel Rodríguez-Ortega, Eduard Rodríguez-López, Natalia Loukachevitch, **Igor Rozhkov**, Elena Tutubalina, Grigorios Tsoumakas, George Giannakoulas, Dimitris Dimitriadis, Alexandra Bekiaridou, Athanasios Samaras, Vasiliki Patsiou, Giorgio Maria Di Nunzio, Nicola Ferro, Stefano Marchesin, Marco Martinelli, Gianmaria Silvello, Georgios Paliouras
[10.1007/978-3-032-21321-1_42](https://doi.org/10.1007/978-3-032-21321-1_42) (Advances in Information Retrieval)
- Methods for Recognizing Nested Terms** May 2025
Igor Rozhkov, Natalia Loukachevitch
[10.48550/arXiv.2504.16007](https://arxiv.org/abs/10.48550/arXiv.2504.16007)
- Domain-Specific Named Entity Extraction from a Heterogeneous Input Stream** Jan 2025
 N. V. Loukachevitch, **I. S. Rozhkov**, B. V. Dobrov
 (Programming and Computational Mathematics: Proceedings of the Conference Dedicated to the 100th Anniversary of N. P. Trifonov)
- NEREL: A Russian Information Extraction Dataset with Rich Annotation for Nested Entities, Relations, and Wikidata Entity Links** June 2024
 Natalia Loukachevitch, Ekaterina Artemova, Tatiana Batura, Pavel Braslavski, Vladimir Ivanov, Suresh Manandhar, Alexander Pugachev, **Igor Rozhkov**, Artem Shelmanov, Elena Tutubalina, Alexey Yandutov
[10.1007/s10579-023-09674-z](https://doi.org/10.1007/s10579-023-09674-z) (Language Resources and Evaluation)
- Pre-trained Language Models for Nested Named Entity Recognition** Jan 2024
 N. V. Loukachevitch, **I. S. Rozhkov**
 (Lomonosov Readings 2024: Scientific Conference, Faculty of CMC, Lomonosov Moscow State University. Abstracts)

Machine Reading Comprehension Model in Domain-Transfer Task <i>I. S. Rozhkov</i> , N. V. Loukachevitch 10.1134/S1995080223080504 (Lobachevskii Journal of Mathematics)	Aug 2023
Prompts in Few-Shot Named Entity Recognition <i>I. S. Rozhkov</i> , N. V. Loukachevitch 10.1134/S1054661823020104 (Pattern Recognition and Image Analysis)	June 2023
NEREL-BIO: A Dataset of Biomedical Abstracts Annotated with Nested Named Entities Natalia Loukachevitch, Suresh Manandhar, Elina Baral, <i>Igor Rozhkov</i> , Pavel Braslavski, Vladimir Ivanov, Tatiana Batura, Elena Tutubalina 10.1093/bioinformatics/btad161 (Bioinformatics)	Apr 2023
RuNNE-2022 Shared Task: Recognizing Nested Named Entities Ekaterina Artemova, Maxim Zmeev, Natalia Loukachevitch, <i>Igor Rozhkov</i> , Tatiana Batura, Vladimir Ivanov, Elena Tutubalina 10.28995/2075-7182-2022-21-33-41 (Computational Linguistics and Intellectual Technologies: Proceedings of Dialogue 2022)	June 2022
Machine Reading Comprehension Model in RuNNE Competition <i>Igor Rozhkov</i> , Natalia Loukachevitch 10.28995/2075-7182-2022-21-488-496 (Computational Linguistics and Intellectual Technologies: Proceedings of Dialogue 2022)	June 2022
NEREL: A Russian Dataset with Nested Named Entities and Relations I. V. Denisov, <i>I. S. Rozhkov</i> , N. V. Lukashevich (Intelligent Systems. Theory and Applications)	Oct 2021

Education

BSc, Lomonosov Moscow State University , Computer Science, NLP - Thesis: A Study of Methods for Automatic Nested Named Entity Recognition - Advisor: Natalia Loukachevitch	Moscow, Russia 2018 – 2022
MSc, Lomonosov Moscow State University , Computer Science, NLP - Thesis: Recognizing nested entities based on flat annotation - Advisor: Natalia Loukachevitch	Moscow, Russia 2022 – 2024
PhD Lomonosov Moscow State University , Computer Science, NLP - Thesis: Methods for Nested Named Entity Recognition - Advisor: Natalia Loukachevitch	Moscow, Russia 2024 – present

Conference Presentations

Dialogue Evaluation 2022 Machine Reading Comprehension Model in RuNNE Competition (oral)	2022
Huawei workshop ‘ML/AI/NLP for search-engine performance improvement’ Prompts in few-shot and cross-domain tasks of nested named entity recognition	2022
Lomonosov Readings 2024, Section of Computational Mathematics and Cybernetics Pre-trained Language Models for Nested Named Entity Recognition (oral)	2024
Conference ‘Programming and Computational Mathematics’ Dedicated to the 100th Anniversary of N. P. Trifonov Domain-Specific Named Entity Extraction from a Heterogeneous Input Stream (oral)	2025

EACL 2026, Student Research Workshop (Rabat)	2026
Learning Nested Named Entity Recognition from Flat Annotations (poster)	
CLEF 2026, BioASQ Lab (online)	2026
Overview of the BioASQ BioNNE-R Task on Nested Biomedical Relation Extraction	

Experience

Research Computing Center of Lomonosov Moscow State University , Researcher	Moscow, Russia
- Developed nested NER and relation extraction methods; contributed to NEREL and NEREL-BIO dataset annotation and release - Co-organized the BioNNE-R Shared Task at CLEF 2026 BioASQ — biomedical relation extraction over nested named entities, with international participation - Applied domain and language adaptation techniques for information extraction in biomedical and low-resource settings	2022 – present 4 years

Projects

BioNNE-R: Nested Biomedical Relation Extraction (BioASQ, CLEF 2026)	2026
Shared task on relation extraction over nested biomedical named entities	
Co-organizer; presented the task overview at CLEF 2026	
NEREL-BIO	2023
Dataset of biomedical abstracts annotated with nested named entities	
Contributed to annotation and dataset release	
RuNNE-2022 Shared Task	2022
Shared task on Russian nested named entity recognition at Dialogue Evaluation 2022 (156 submissions from nine teams)	
Developed the baseline system	
NEREL	2021–2024
Russian information extraction dataset with nested named entities (29 types), relations, and Wikidata entity links	
Contributed to annotation and dataset release	

Teaching Assistantship

Methods and Tools of Information Retrieval	2024, 2025
Departmental Practicum	2025

Professional Service

Developed baseline system for RuNNE-2022 Shared Task	2022
Co-organizer, BioNNE-R Shared Task (nested biomedical relation extraction), BioASQ Lab at CLEF 2026	2026

Awards

Lomonosov Moscow State University Scholarship for Young Researchers, Graduate Students, and Students with Outstanding Achievements in Teaching and Research	2024
--	------

Skills

Programming: Python, PyTorch, Hugging Face Transformers
Methods: Nested NER, Relation Extraction, Information Extraction, Few-shot Learning, LLM Prompting
Tools: Git, LaTeX, Linux, Docker

Languages

English: C1

Russian / Русский: Native

Japanese / 日本語: B1 level / JLPT N4
